

What is Home Health Care?

Home health care provides

- Skilled nursing care
- Physical therapy
- Occupational therapy
- Speech therapy
- Medical social services

delivered in the comfort of your own home.

Our goal is to help you recover, regain your independence and empower you to reach and keep your physical, mental and social wellbeing.

Home health care is ordered by your doctor. Our home health care professionals work with you and your doctor to evaluate your health care needs and establish a plan of care to provide services to meet those needs. Home health care is usually less expensive, more convenient, and having care provided at home is most often preferred.

Skilled Home Health Care SERVICES

- Disease Process Education/
Symptoms/Coping Mechanism
- Catheter Care
- Diet Instruction
- Pain Control
- Medication Management
- Incontinence Management
- Fall Prevention
- Physical Therapy
- Speech Therapy
- Personal Care
- Referrals to Community Resources
- Wound and Ostomy Care
- IV Infusions
